Cat Writing Technique

This technique is useful for teaching handwriting neatness, which includes the components of sizing, spacing and placement on the line.

Use the handwriting cat to show how to construct each letter of the alphabet. The handwriting cat breaks each letter into 3 separate components - head, body and tail. A popstick spacer with a CAT drawn on it the same size as the lined paper used in class can be a usable and moveable tool.

The chart below outlines the sizing expected when using the CAT technique.
